7   Notice ⚠️

▲ Do not repair the machine or change the machine parts at will, otherwise the machine will be damaged or serious accidents will be caused.

▲ Do not use the machine in a wet court or rainy day, wet ball will cause ball stuck or damage.

▲ If hit the ball into the machine accidentally,turn off the power right away and then take out the ball.

▲ It is forbidden to stand at the ball outlet when the machine is working.

▲ Do not move the machine while it is working.

▲ It is forbidden to touch the inside of the machine by hand to avoid accidents.

▲ Clean the tennis fur or sundries in the machine regularly，Be sure to cut off the power when cleaning the machine, otherwise maybe cause danger.

▲ Minors are strictly prohibited from operating the machine without permission to avoid endangering personal safety and damaging the machine.

▲ It is forbidden to tear up the machine bar code.

Caution:
If maintenance is required,
please contact manufacturer

8   Precautions for using lithium batteries ⚠️

1. Batteries are classified as dangerous goods. Do not let minors use them. It is strictly prohibited to drop, throw, impact, crush, puncture, or short-circuit the positive and negative poles of the battery, in order to avoid serious safety hazards such as fire or explosion.

2.Do not transport, store, or use devices in high temperature or humid environments, otherwise it will damage the battery. Using or charging the battery in an environment above 50℃ can also pose safety hazards.

3.Use the dedicated charger provided with the device for charging. Using an incompatible charger can damage the battery's lifespan. Charge the device in a spacious area without flammable or foreign objects nearby. Continuous charging should not exceed 24 hours.

4. After the battery is discharged, it should be charged promptly or within 24 hours. If the device is not used for a long time, charge the battery at least once every 6 months, otherwise it will shorten the battery life or cause damage that prevents charging.

5. Batteries must be scrapped after 5 years of use or storage. Otherwise, there may be serious safety hazards such as spontaneous combustion or explosion during storage, use or charging. Dispose of batteries that have been used for more than 5 years according to the local hazardous materials disposal process.

9   Common faults and solutions

FAQ	Cause	Solution
No power	1.AC/DC power selection error. 2.Fuse broken.	1.Choose the correct power. 2.Change new fuse.
No serving	1.The machine power or remote control switch is not turned on. 2. Ball stuck inside of machine.	1.Check the machine power and remote control switch. 2.Power off the machine to take out the ball.
Ball out off court	1.The machine is placed incorrectly. 2.The speed is too fast. 3. Mix to use different standard tennis balls.	1. Put the machine in correct place. 2.Decrease the speed by remote control. 3.Use the same standard tennis balls.

Note：1. The equipment is with two wheels to rotate and squeeze to shoot out the ball, so would slightly wear the ball, which is normal .
2. The dropping point would slightly deviated if the quality of the ball is different and the position of the machine is different.
